Foreword

Foreword

The Kilvilcorris Charolais Herd was established in 1988 with the purchase of six very good Charolais heifers, two coming from the Prime Herd of Benny Keating. Over the intervening years we have grown the herd to its present standing consisting of 45 breeding cows, using exclusively the best genetics available to us through AI.

We have always held the view that if you build up a herd of very good hard working cows they will consistently produce the top end commercial bull. Structure, function, calving ease and correctness are the corner stones of our breeding policy. All cows rear their own calves. We sell approximately 20 bulls annually, with about 50% to repeat customers.

The heifers in this sale are all export tested, all scanned reproductively sound and are all fully genuine. They are being offered for sale in their natural condition having only being assembled as a group two months prior to the sale.

I would like to wish the very best of luck to all potential customers and I look forward to seeing the progeny of these females in sales catalogues over the coming years.

Regards,

P.J. Ryan
